SANI-MIST SANITIZING SYSTEM

WHAT IS SANI-MIST?

Misting is used predominately for the application of disinfectants. The misting equipment generates a mist or fog formed of Ultra Low Volume (ULV) droplets. Through vaporization, airborne and surface-based pathogens are destroyed, so there is no need to move furniture or equipment around for the treatment to work.

The Sani-Mist sanitizing system allows you to treat an entire area in a fraction of the time and ensures the right amount of product is being applied to the surface. Switching to the Sani-Mist system will keep money in your pocket, helping your business remain operational.

WHY IS IT BETTER?

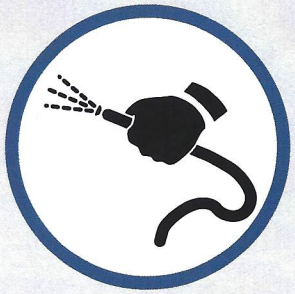
FASTER. SAFER. CLEANER.

Sani-Mist uses a hydrogen peroxide disinfectant which is known to be a healthier alternative to traditional disinfectants. Maxim Facility+ kills viruses in five minutes whereas our competitors' quat products take twice the amount of time.

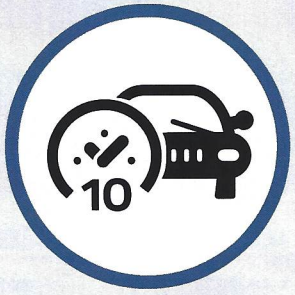
Hydogren peroxide breaks down into water and oxygen leaving no residue and no risk of transfer to skin. It is safe for use on all hard and soft surfaces and will not damage fabric when used properly.

READY IN FOUR STEPS

1. Clean interior surfaces



2. Disinfect area thoroughly, moving from top to bottom



3. Wait 10 minutes for product to settle and disinfect

4. Ready for operation

HOW TO CHOOSE YOUR SYSTEM

1. CHOOSE YOUR EQUIPMENT

Power Source	Recommended Equipment	Range
1.2 CFM air supply	612 Low-Volume Compact Sprayer (697.0034)	6 ft
3.7 CFM air supply	633 Standard Compact Sprayer (697.0035)	15 ft
7.4 CFM air supply	305 High-Volume Compact Sprayer (697.0033)	25 ft
No air supply, 120V electric outlet	PD Precision Mister (697.0037)	15 ft

2. LOAD YOUR CHEMICAL

Product	Scent	Dilution	Dwell Time	Active Ingredient
Maxim Facility+ (891.6866)	No added scent	1:64 (2 oz/gal)	5 min	H_2O_2

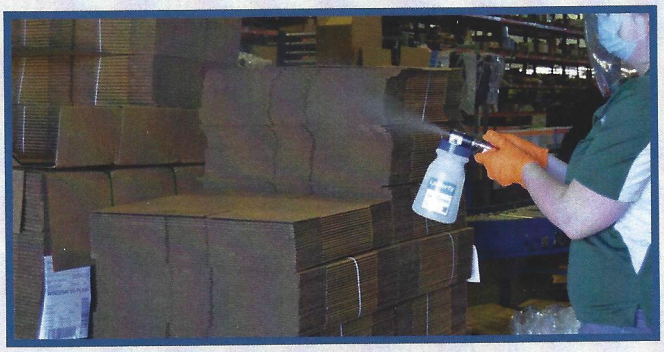
3. DETERMINE YOUR FLOW RATE

Recommended to start with ~4 oz/min corn yellow metering tip. Adjust as needed to ensure surface remains damp for duration of dwell time.

4. PERSONAL PROTECTION EQUIPMENT (PPE)

When atomizing disinfectant, N95 mask, gloves and eye protection are recommended.

HOW TO USE YOUR SYSTEM



DISINFECTING A SPACE

1. Start at the back of the room
2. Working backwards direct mist to all exposed areas
3. Give mist time to settle*

* Settle time dependent on environmental conditions including temperature, humidity and ventilation

DISINFECTING A VEHICLE

1. Start at the back of the vehicle
2. Spray all exposed surfaces
3. Close vehicle for dwell time
4. Circulate A/C system for two minutes
5. Roll down windows and ventilate

COMPACT MISTER

Compact Solution for All Industries

Description

The compact misters are specifically geared to the needs of the automotive industry. This light-weight setup is perfect for manuevering around a vehicle and around varied spaces.

Features

- Portable hose-end mister makes it easy to mist hard-to-reach areas, or where fixed location misters are impractical
- Easy to use! Just fill the bottle with pre-diluted chemical, connect compressed air, and press the thumb-trigger activator
- Heavy-duty, easy-grip trigger gun
- Precision metering tips allow the user to refine the particle size and project a lighter mist to avoid over-wetting surfaces
- Lightweight 32 oz bottle

Part No.	Description	System Requirements	Sell Price
697.0034	612 Low-Volume Compact Mister	Minimum 1.2 CFM, 80 PSI compressed air systems	
697.0035	633 Standard-Volume Compact Mister	Minimum 3.7 CFM, 80 PSI compressed air systems	
697.0033	305 High-Volume Compact Mister	Minimum 7.4 CFM, 80 PSI compressed air systems	

PD PRECISION MISTER

Mobile Solution for All Industries

Description

The PD Precision Mister is great for commercial and industrial use where large spaces inhibit the range of an air line. This cart may be used anywhere there is a power source available.

Features

- Self-contained, portable system
- Projects light, "damp" mist particles up to 15'
- 10 precision metering tips allow the user to refine the particle size
- Durable and easy to manuever cart
- 50' hose
- Tight head 5 gallon pail with draw cap

Part No.	Product Description	System Requirements	Sell Price
697.0037	PD Precision Mister	120V Outlet	

MODEL 20 COMPACT SPRAYER

Compact Solution for Outdoor Spaces

Description

The Model 20 Compact Sprayer makes disinfecting outdoor spaces simple. This system is ideal for restaurant patios, playgrounds and parks to disinfect tables, benches and seating areas.

Features

- Attaches to standard garden hose
- Automatically dilutes concentrated disinfectant
- Great performance with water pressure as low as 20 PSI
- Includes 20 color-coded precision metering tips to customize dilution ratio
- Disperses as a low-volume spray that dries quickly
- Ergonomic handle for comfortable use

EASY-TO-USE

FAST

OUTDOORS

Part No.	Description	System Requirements	Sell Price
697.0036	Model 20 Compact Sprayer	Standard garden hose with minimum 20 PSI	

MAXIM FACILITY+

Hydrogen Peroxide Disinfectant

Description

This product is a one-step hospital-use germicidal cleaner and deodorant, designed for general cleaning, disinfecting and controlling mold and mildew odors on hard, non-porous surfaces.

Features

- One gallon of product makes 65 gallons of ready-to-use disinfectant
- Leaves no residue. Breaks down into water and oxygen
- EPA N-list approved for use against 2019 Novel Coronavirus
- 5 minute dwell time for virucidal effectiveness
- Perfume and dye-free
- EPA registered 45745-11
- Up to 400 applications per gallon (*based off 5 minute application time*)

Part No.	Description	Size	Sell Price
891.6866	Maxim Facility + H_2O_2	1 Gal	
891.6866.1	Maxim Facility + H_2O_2	4 x 1 Gal Case
